

# Winfred Grace Kendi

## Software Developer

Kendi is always interested in learning new things. She is currently taking up a Human-centered Design Course on Coursera to learn how to design technologies that enhance interaction with users. She aspires to build a platform where youths can interact with each other and psychologists for their mental health wellness. She is currently working on a data management system for community health workers which will help her grow her skills in data analysis , database planning and design.

## SKILLS

Good understanding of material design components and tools in Kotlin .

Conducting UX Research to identify target users and creating user personas and journey.

Creating wireframes and prototypes for user testing through the design process

Building landing pages,multi-page websites HTML,Bootstrap,CSS and using media queries to make them responsive.

Using Python and Django framework in developing server-side interfaces of applications, querying, updating and organizing data in databases.

## PERSONAL PROJECTS

### Student Registration App

- Used Kotlin to create a simple set-up for students enrollment in te campus. <https://bit.ly/3gtdXEA>

### Flix and Chill Movie website.

- I created a website that enables users to watch movie trailers. <https://vigilant-gates-a2883a.netlify.app>

### Candy Dairies

- Designed a mobile app that enables users to buy dairies and enable customers to order specialties. <https://bit.ly/3gcylo7>

### ContactViewApp

- I created a simple phone book that displays different contacts on a recycler view. The contacts show an image and socials of the person. <https://bit.ly/3slxKoJ>

### School Management System

- A system that enables institutions to manage all the staffs and students data and shows the courses and events of the year. <https://bit.ly/3z1Qjyh>

## HOBBIES

Hiking, travelling, vlogging and charity work
