

QUESTION 1:PROBLEM STATEMENT.

Communication in AkiraChix is important to carry out our day to day activities.We all need the right communication channels that everyone can access anytime,anywhere.Students have slack installed in their laptops where important information is passed through,but they don't get to carry it everywhere hence some information doesn't reach them on time and later brings confusion.Sometimes the internet is slow, hence the message is not delivered at the time it is supposed to.

Problem statement:How might we improve communication to minimize confusion in the AkiraChix community.

QUESTION 2:ULTIMATE IMPACT

Beneficiary:The AkiraChix community,
Through quick and effective communication accessible by everyone,anywhere and it will minimize time wastage,delays and confusion.

QUESTION 3:POSSIBLE SOLUTIONS

- ☐ Electric gadgets on the walls that notify people whenever there is information being passed.
- ☐ A system that sends important information crawling at the bottom of everyone's laptop screen
- ☐ A digitalised noticeboard that automatically updates itself when there is any information to be passed across and is accessible to everyone
- ☐ A smart watch for every student that notifies them of important information on the slack channel
- ☐ A smart TV that has the notification tab and has a led light that shows when there is a notification.

QUESTION 4:CONTEXT AND CONSTRAINTS.

Context :We are solving a problem for an educational environment.

Constraint:

- ☐ Financial constraint.
- ☐ Lack of commitment by the project team.
- ☐ Improper planning on how to run the project.
